

Internet Subsidy

The National Executive has approved financial support of up to \$25 per month for your Local to have internet access. It based this decision on a number of factors such as:

1. Immediate access between Local members and their union representatives or elected officers - independent of the departmental system for purposes of security
2. A means of Local research and gradual reduction of mailed material upon request of the Local
3. Providing help to Locals to financially afford e-mail and web page access.

Requirements

1. Local must be in good standing.
2. Local must provide an e-mail address outside of the workplace
3. Local must provide proof of payment - in January and July of each year to receive full payment of up to \$25 per month.
4. Local must be responsible to disseminate the information.
5. Local will reimburse, by the monthly check-off, should it stop the internet service prior to the end of period for which it is paid.

Local NO _____ E-mail address _____

Location and name
of responsible person for e-mail _____

I agree to this arrangement:
